

Testing & Quality Assurance for a Simple Banking System

System Description:

You will design and test a **Simple Banking System** that includes the following features:

- User Login
- View Account Balance
- Transfer Money
- Transaction History
- Change Password

The goal of this project is to apply **Software Testing concepts**.

Project Requirements

1. Scope & Requirements (3 Marks)

- Define the **system scope**
- Write **8 to 10 functional requirements**
- Define **success criteria**

2. Quality Factors (3 Marks)

Select and explain **at least 5 quality factors** , and Apply each factor to your system.

3. Test Design (5 Marks)

4. Test Execution (3 Marks)

Execute at least **20 test cases** using the following format:

Test ID	Scenario	Input	Expected Output	Actual Output	Status
---------	----------	-------	-----------------	---------------	--------

5. Test Evaluation

Analyze your results:

- Identify any **failures**
- Explain the possible **fault**
- Distinguish between:
 - Error
 - Fault
 - Failure
- Explain how testing helped reduce **ris**

6. Final Report & Presentation (3 Marks)

- Report: **8–12 pages**
- Presentation: **5–7 minutes**
- All team members must participate

Team

- Each group: **2–3 students**

Deliverables:

1. Final Report Must include:

- Scope & Requirements
- Quality Factors
- Test Design
- Test Cases
- Test Execution Table
- Test Evaluation

2. Test Cases File

- Excel or Google Sheet
- Contains at least **20 test cases**

3. Presentation

- 5–10 slides maximum
- Clear explanation of your work

4. Presentation (In Class)

- 5–7 minutes per group
- Each member must speak
